PROFESSIONAL SUMMARY

Aspiring DevOps & Cloud Engineer with hands-on experience in AWS, Linux administration, CI/CD pipelines, Docker, and Kubernetes. Skilled in automation, monitoring, and prompt engineering. Passionate about delivering cloud-based solutions and efficient DevOps workflows.

TECHNICAL SKILLS

- **Cloud & DevOps:** AWS (EC2, S3, Lambda, VPC, IAM, CloudWatch), Jenkins, Docker, Kubernetes, CI/CD pipelines
- **Linux & Scripting:** Linux commands, Bash scripting, cron jobs, task automation
- **Monitoring & Tools:** Prometheus, Grafana, Git version control, Docker Compose
- **Other Skills:** Agile & SDLC concepts, networking basics, microservices architecture, YAML

EDUCATION & TRAINING

Self-Learning Courses (Ongoing) – UK

- DevOps Foundations, Cloud Computing, Linux Administration
- CI/CD, Docker, Kubernetes, Prompt Engineering

PROJECTS / HANDS-ON EXPERIENCE

- **AWS Cloud Projects:** Configured EC2, S3, VPC, Lambda, IAM; automated resources with CloudFormation; monitored with CloudWatch
- **Docker & Kubernetes:** Built Docker images, deployed containers; managed pods, services, and cloud Kubernetes (GKE/EKS/AKS)
- **CI/CD with Jenkins:** Designed pipelines integrating GitHub and Docker; automated build, test, and deployment

- **Linux Hands-On:** Managed users, permissions, packages; automated tasks with shell scripting and cron jobs
- **Git & GitHub Workflow:** Implemented version control, branching, merging, pull requests; deployed sample projects
- **Monitoring & Alerting:** Created dashboards and alerts in Prometheus and Grafana
- **Prompt Engineering:** Developed AI prompts and templates; conducted hands-on experiments and documented best practices

CERTIFICATIONS & COURSES

- AWS Certified Solutions Architect – Associate (Udemy)
- DevOps & Cloud Engineer (EMC)
